HUD determines the median (100%), very low (50%) and 60% income limits. Adjustments are made by HUD for areas with unusually high or low family income or housing cost to income relationships. Pursuant to rules for the Low Income Housing Tax Credit Program, the 60% income limit is calculated as 120% (60/50) of the very low income limit for each family size. The income limits for other income groups of 80% or less are calculated in the same way. The remaining income limits are calculated as a percentage of the median income for a family of four (the base) with adjustments for family size (i.e., income for a 3-person family is 90% of the base, income for a 2-person family is 80% of the base, etc.).
